I'm

Robotics enthusiast with hands-on experience in hardware projects, and robotics prototyping. Skilled in designing, assembling, and testing robotic systems, sensor integration, and basic automation. Strong team player with a passion for learning, and applying engineering concepts to real-world robotic applications.

Education

February 2025

Birla Institute of Technology, Hyderabad

Hydrabad, India

BSc(Hons) in Computer Science

- **Relevant Coursework:** Equivalency for any prerequisites for a 4-year undergraduate programme. Advance Knowledge in Computer Application & Machine Learning.

Projects | Hardware

Quadruped Robot

- Designed and built a quadruped robot mechanical structure from scratch, focusing on stability, leg geometry, and load distribution.
- Developed a low-cost, modular chassis enabling reliable walking gaits and future sensor/electronics upgrades.
- Validated structural strength and balance through locomotion testing (forward & backward gaits).

F-22 Raptor RC Aircraft

- Designed and built a lightweight F-22 Raptor model using thermocol, focusing on structure and balance.
- Implemented wireless control using FlySky RC transmitter with FS-iA10B receiver for aircraft maneuvering.
- Integrated RC components and control surfaces, gaining hands-on experience in basic aerodynamics and flight control.

Manually Controlled Robotics Hand

- Built a robotic hand prototype controlled manually using strings and pulleys.
- Designed finger joints using cardboard/plastic and connected them with flexible threads.
- Demonstrated basic finger movements by mimicking hand motion through mechanical control.

Experience

Student Volunteer – Campus Events Committee

Inter-school Event

- Helped organize student events, including orientation week and cultural festivals
- Coordinated with team members to manage logistics and setup.
- Gained experience in teamwork, time management, and event planning

Neura robotics

STEM - Student Exploring Robotics Innovation

I am a robotics enthusiast with a basic understanding of programming and electronics. I enjoy learning how robots work and have participated in small team projects using Arduino and sensors. I'm excited to grow my skills and contribute to real-world robotics solutions.

HTML, CSS

Self-Learning

Skilled in creating simple and responsive web pages using HTML, CSS, and basic JavaScript for adding interactivity. Creative mindset with a passion for designing and building things differently. Some basic Knowledge of **BOOTSTRAP**.

Graphic Designer

Marketing Intern as Graphic Designer

December 2025

Bengaluru, India

Graphic Designer Intern at Data Corp Traffic (2-month internship), responsible for designing posters, social media creatives, and digital assets using Canva, Inkscape, and MS Office tools, while assisting with basic layout design, visual consistency, and collaborating with the team to produce clear, visually effective content.

Skills

Robotics & Technical Skills

- Robotics Fundamentals
- Hardware Prototyping
- Embedded Systems (Beginner)
- Sensor Integration
- Basic Automation & Control
- Team Collaboration on Technical Projects

Tools & Platforms

- Canva
- MS Office 365
- Google Suite (Docs, Sheets)
- Excel
- Google Arts
- Data Management Tools

Programming & Technical

- IoT
- HTML, CSS, JavaScript
- C, C++, Java, Python
- DBMS
