I'm

Robotics enthusiast with hands-on experience in hardware projects, and robotics prototyping, with a sharp eye for creative designs, sketching. I pay meticulous attention to the details where accuracy is everything. Skilled in designing, assembling, and testing robotic systems, sensor integration, and basic automation. Strong team player with a passion for learning, and applying engineering concepts to real-world robotic applications.

Education

February 2025

Birla Institute of Technology, Hyderabad

Hydrabad, India

BSc(Hons) in Computer Science

- **Relevant Coursework:** Equivalency for any prerequisites for a 4-year undergraduate programme. Advance Knowledge in Computer Application & Machine Learning.

Skills

Robotics & Technical Skills

- Robotics Fundamentals
- Hardware Prototyping
- Embedded Systems (Beginner)
- Sensor Integration
- Basic Automation & Control
- Team Collaboration on Technical Projects

Tools & Platforms

- Processing
- Arduino IDE
- Canva
- MS Office 365
- Google Suite (Docs, Sheets)

Programming & Technical

- IoT
- HTML, CSS
- C, C++, Java

Projects | Hardware

[Portfolio \(Includes all projects\)](#)

Mobile Robotic Manipulator

- Built a six-wheel mobile robotic manipulator for remote operation in hazardous and hard-to-reach environments.
- Integrated a 6-DOF robotic arm with a mobile rover using ESP32, STM32, and ESP-NOW for low-latency wireless control.
- Implemented obstacle detection, tilt monitoring, robotic arm manipulation, and real-time wireless operation for safe object handling.

Quadruped Robot

- Designed and built a quadruped robot mechanical structure from scratch, focusing on stability, leg geometry, and load distribution.
- Developed a low-cost, modular chassis enabling reliable walking gaits and future sensor/electronics upgrades.
- Validated structural strength and balance through locomotion testing (forward & backward gaits).

F-22 Raptor RC Aircraft

- Designed and built a lightweight F-22 Raptor model using thermocol, focusing on structure and balance.
- Implemented wireless control using FlySky RC transmitter with FS-iA10B receiver for aircraft maneuvering.
- Integrated RC components and control surfaces, gaining hands-on experience in basic aerodynamics and flight control.

Hand Gesture Controlled Robotics Hand

- Built a gesture-controlled robotic hand using OpenCV, Arduino, and servo motors for real-time finger motion control.
- Designed and fabricated the robotic hand using cardboard/plastic, mechanical finger joints, and flexible thread-based linkages.
- Implemented hand gesture recognition with OpenCV to track finger movements and replicate them on the robotic hand.

Handmade Carbon Fiber Drone

Self-Balancing Robot

Line Following Robot

Experience

Neura robotics

STEM - Student Exploring Robotics Innovation

Worked on the design, assembly, and integration of robotic systems, focusing on embedded hardware, electronics, and mechanical design. Contributed to developing mobile robots, robotic manipulators, and sensor-based systems using ESP32, STM32, Arduino, and various sensors. Strengthened practical skills in robotics prototyping, system integration, troubleshooting, wireless communication, and hardware testing while collaborating on innovative robotics projects.

HTML, CSS

Self-Learning

Skilled in creating simple and responsive web pages using HTML, CSS, and basic JavaScript for adding interactivity. Creative mindset with a passion for designing and building things differently. Some basic Knowledge of **BOOTSTRAP**.

Graphic Designer

Marketing Intern as Graphic Designer (Secondary Skill)

December 2025

Bengaluru, India

Graphic Designer Intern at Data Corp Traffic (2-month internship), responsible for designing posters, social media creatives, and digital assets using Canva, Inkscape, and MS Office tools, while assisting with basic layout design, visual consistency, and collaborating with the team to produce clear, visually effective content.
